Experience

Onepoint, Paris (75)

Full-stack developer

2019–present

- Full-stack developer, full-time 2023–present
- Full-stack developer, apprenticeship 2020–2023
- Developer intern (6 months) 2019

A comprehensive internal platform serving 3,000+ employees, built in a team of 5. From apprentice to full-time developer, I took ownership of design, development and deployment, delivering tools that improved efficiency, onboarding and internal communication.

Key projects

- Ticket management

Redesigned the helpdesk system, improving usability and analytics for staff.
- Ticket handling

Handled support tickets for production issues and assisted employees using the platform.
- Onboarding and offboarding

Developed an interactive tool that streamlines employee onboarding and offboarding.
- Events and visitors

Created a solution that simplifies how events and visitors are handled.
- Teams AI assistant

Delivered an AI-powered assistant in Microsoft Teams that helps employees find information quickly.
- CI/CD pipelines

Implemented automated testing and deployment to reduce errors and speed up delivery.
